

The SilvaGro Partnership

Employment Opportunity

The SilvaGro Partnership is seeking a **Seedling Production Assistant** for our greenhouse facility in Quesnel, B.C.

Reporting to the Site Manager, the successful candidate will be a part of our growing and production team, with primary responsibility for the operational phases of forest seedling production. You will have a good understanding of greenhouse environments and plant sciences, with an emphasis on seedling nutrition and cultural practices. You will have good leadership skills, as you will be assisting in the supervision of seasonal crews of up to 100 people.

A working knowledge of computer-based greenhouse climate controls would be a definite asset, as would be good familiarity with Microsoft Excel and Word.

You should have completed a degree or diploma course in Horticulture or Plant Sciences, preferably with a specialization in greenhouse crops.

This is a career position, as the successful candidate will be trained to be a senior member of The SilvaGro Partnership management team. There are numerous opportunities for advancement within and between current sites and as we seek to expand our production capacity. We offer a very attractive compensation package, with extended health benefits, RRSP contributions, and performance bonuses.

In operation since 1985, The SilvaGro Partnership is one of the largest forest nursery companies in Canada, producing 45 million seedlings annually for clients throughout the Western Provinces. We provide growing and cold storage services from two sites: an outdoor compound facility near Kamloops, B.C., producing mainly pine seedlings, and a greenhouse facility in Quesnel growing primarily Spruce, Douglas Fir, and Larch trees.

We also have a few positions available for Co-op and summer students.

Please submit resumes and a letter expressing your career interests and goals to ceves@silvagro.com by March 31, 2017.
