

**Position Title:** Product Development Technician, for Summer 2017

**Location:** Regina, Saskatchewan

**Key Responsibilities:**

Work alongside our Research and Biological Assessment team in conducting a crop protection small-plot research program. This will involve the preparation of research materials, plot layout, application of compounds, record keeping, data collection, and analysis of results. Experience will be gained in agricultural practices, crop production, machinery operation, identification of weeds, insects and crop diseases, and trial methodology.

**Position Guidelines:**

Ideal candidates are working toward a Bachelor's Degree or Diploma in Agriculture (Science or Agribusiness) or Biology and have a farm background or previous relevant summer experience, however all experience levels and academic disciplines are welcome to apply.

Interested applicants are encouraged to submit a resume and cover letter to [Kelly.Tiller@syngenta.com](mailto:Kelly.Tiller@syngenta.com) with reference to the position you are applying for in your subject line.

Good luck with your studies. We look forward to hearing from you!
