

G. D. Newton and Associates Inc., located in Brandon, MB, provides municipal engineering services throughout rural Manitoba to numerous communities, towns, municipalities, private developers, contractors, and industry. The services provided include development of concepts for future development, detailed design for construction and project management, site inspection, and a full range of survey services including machine control.

Our business has grown each year since its inception in 1997. To continue to meet the steadily growing demands of our customers we are looking for summer staff to work as survey assistants.

The number of positions available will be either one or two.

The successful candidate will be exposed to a variety of projects that will commonly include earth moving, sewer, water, land drainage and street installations.

The majority of the work will be within or immediately next to Brandon. However, periodically the work location may vary from central Saskatchewan to all of Manitoba.

An ideal candidate will be enrolled in either a Civil Technology or a Civil Engineering Program. They must have the ability to work outside in all weather conditions. They will need to have good communications skills and possess the ability to work with other individuals. They must also be available to travel periodically to job sites that are not in the Brandon region. This would include staying overnight in areas away from Brandon. The candidate must have a valid class 5 or better driver's license.

The candidate will be required to provide steel toed work boots, gloves and work clothing. Rain suits, rubber boots and other safety gear will be provided by the employer.

Wages will be \$17.50 per hour. The position will commence as early as May 1<sup>st</sup> and will continue through the summer to the end of the construction season.

Please forward resumes via email to Kelsey Swidnicki, Administrative Officer. Closing date is March 31<sup>st</sup>, 2017.
