

WANTED: Offroad Equipment Heavy-Duty Mechanic

We are currently seeking an **Offroad Equipment Heavy-Duty Mechanic** for our **Virден, MB** shop and to perform at-the-jobsite servicing and repair of dozers, graders, excavators, rock trucks and other construction site equipment.

Responsibilities:

- Diagnose faults or malfunctions and test repaired equipment for proper performance
- Ensure that all mechanical work meets manufacturer's specifications and legislated requirements.
- Adjust equipment and repair or replace defective parts, components or systems
- Work with apprentices teaching them safe and proper procedures of the job
- Complete in-shop repair orders
- Interpret Service Request Forms and technical manuals
- Comply with applicable safe work practices and procedures

Certification and skill requirements:

- Valid driver's license.
- Valid Journeyman or Red Seal Certification.
- Mechanical ability and an interest in all types of machinery and engines, electronics and precision equipment.
- Computer knowledge (to use service software).
- Standard First Aid Level A or C
- Ground Disturbance Level 2, CSTS-09, H2S Alive may be required prior to site access

This is a full-time, permanent position with competitive wages & group benefits. If the successful applicant prefers to work as a contractor, this can be negotiated. All GCS workers are subject to pre-access drug & alcohol testing at orientation. Applicants for this job **MUST** be within driving distance of our Virден Shop or willing to relocate.

Please email your resume to: resumes@gcsenergy.ca We thank all applicants for their interest however, only candidates selected for an interview will be contacted.
