

IT Project and Technology Implementation Specialist

CIO Office

Full-time, Regular

Competition #80-18/19

Brandon, Manitoba

Salary: \$66,744 to \$86,924 per year

Information Technology Specialist 3

Assiniboine Community College strives to create exceptional learning experiences for our students. We place a high priority on student success and are committed to building an environment that creates and supports a high level of student engagement. The CIO office supports faculty, students, and staff in their use of technology, in the development and implementation of software applications, and in the implementation and support for infrastructure services. The CIO office is looking for an IT Project and Technology Implementation Specialist to manage the configuration, deployment, and technical implementation of new functionalities and modules of the College's ERP system; new in-house developed applications; and third party off the self-software.

Be Passionate

You have a passion for emerging technologies and for managing and driving technology innovations and technical implementations to a successful conclusion requiring solid agile project management skills coupled with strong technical background and know how. You are passionate about developing agile processes for managing projects, evaluating new software functionalities and for conducting proof of concepts.

Take Initiative

You are the type of person who does not have to wait for direction, you take initiative when working on a portfolio of projects to meet deadlines; you also demonstrate professionalism, a sense of urgency, responsibility balanced with the ability to work independently within a team. You will lead the setup, test, launch and post-launch technical implementation activities of all new ERP functionalities/modules, in-house developed applications, and off the shelf third-party software. You will be tasked with gathering requirements, accurately documenting the business and process needs of functional areas, and establishing relationships internally and externally.

Deliver Results

In order to deliver the results needed, you will have experience and knowledge of agile project management methods and best practices and have strong technical and analytical mindset. You will have a Bachelor level degree or higher in Computer Science, Computer Engineering or related fields. You will have exceptional oral and written communication skills, strong time and deadline management and organizational skills. You will have the ability to conduct a variety of research into emerging technologies and new software product functionalities. You will have basic knowledge of some of the most common programming languages and technologies (computer programming, .NET technologies and languages, Web technologies and languages, and database technologies and languages). You must be enthusiastic and creative with excellent attention to details, have strong collaboration skills, and be self-motivated.

This competition will remain open until filled.

Assiniboine Community College campuses are located on traditional territories of Treaty No.1 and Treaty No.2, the shared traditional lands of Cree, Oji-Cree, Dakota, Dene and Anishinabek/Ojibwe peoples, and the homeland of the Métis Nation.
