IMPACT REPORT

Skills that grow with you

Ag Extension programs connect people, ideas, and innovation to strengthen agriculture in Manitoba and beyond. Over the past year, we've delivered practical learning opportunities, built partnerships across industry and community, and our students have gained knowledge

that supports producers and the broader ag sector. This report highlights key milestones, and impacts from the year—showcasing how together, we are cultivating growth by building skills.

Launched in 2024-2025

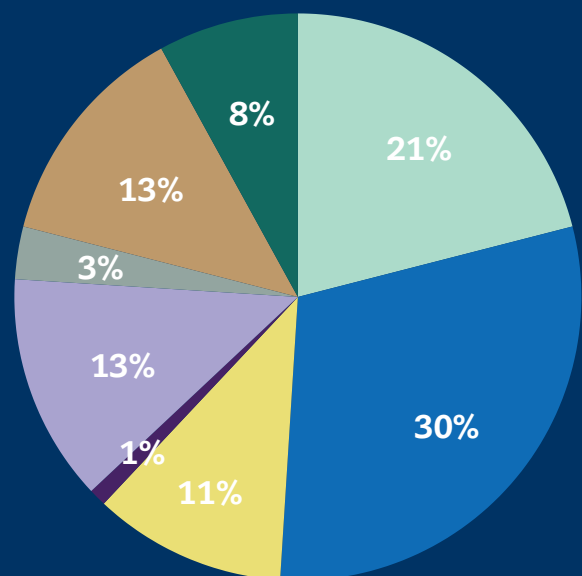

Digital Ag Fundamentals: An eight-week intensive online program that equips future professionals with the skills and knowledge to apply emerging technologies that drive efficiency, sustainability, and innovation in agriculture.

Canadian Prairies Trusted Advisor Program: Providing agronomists with soil health knowledge to make informed decisions that enhance productivity, sustainability, and profitability for producers.

Featured Program: Pesticide Certification

In Manitoba, pesticide certification ensures that individuals who apply or sell pesticides have the knowledge and training to use them safely, legally, and responsibly. Assiniboine College provides pesticide certification training and exams in 18 categories to pesticide applicators in the province.
