Wade will share his journey in the Agriculture industry— the ups, the downs, and everything in between—highlighting the challenges and opportunities in this dynamic sector. Wade has held various roles within the industry, and is best known for serving as CEO at Farmers Edge Inc for 17 years before founding Ronin Agronomy. He has built a legacy in the farming industry, from local fields to the global stage. Now at the helm of Ronin Agronomy and a Founding Partner at Invictus Farmland, Wade's passion and dedication for innovation and growth continues to shape the future of agriculture.
