Then think about us for this outstanding opportunity.

If you are a looking to break out of the status quo by joining an organization - where you will have the ability to put your stamp on things this may be the place for you!

About Us

Clean Water Pro has been growing rapidly and is looking for an ASSISTANT LAB TECHNICIAN to help us continue this growth. Our company specializes in remediating lakes & ponds and has been in business since 2008.

Clean Water Pro sells, installs, and maintains fine bubble aeration systems designed to pump dissolved oxygen into stagnating water. Other services include bacterial treatments, pond dyes, and vegetative management solutions (in the water and on the shore). Clean Water Pro also provides a valuable diagnostic service for assessing the precise stage of your dugout, pond or lake. Clean Water Pro takes a comprehensive approach to the physical, environmental and chemical composition of water and the surrounding area.

We are located southwest of Winnipeg in beautiful Carman, Manitoba!

Job Description

The position of **Assistant Lab Technician** is critically important, as the successful candidate will be in direct control of water analysis, lab duties, algae identification, aquatic weed identification, equipment maintenance, remediation product knowledge, client sales, data collection and recording, scientific report writing. The incumbent must be 100% dedicated to providing the very best in customer care and attention to detail.

To analyze water samples, algae, weeds, invertebrates, assist the field technicians. Candidate must be self-motivated and able to work independently and as part of a team. Candidate must be willing to learn about water remediation. Record keeping and report writing a must..

You will report to the President. You will work as team and work independently at times. And you will, for sure, be expected to bring new ideas to the table.
