

West-Can Human Resource Solutions is currently recruiting for a Structural Steel Estimator position in Brandon, MB.

Estimators are responsible for completing preliminary designs and providing price cost estimates based on the evaluation and interpretation of customer supplied information. Through this process Estimators are required to work within code requirements, proper engineering practices, building system standards and system costing structure. Acting as a contact, our Estimators assist in the coordination of information and provide customer service to new and established customers

This role requires:

- Completion of a Structural, Civil, Biosystems or Mechanical Engineering Technical diploma or degree
 - o A Certified Engineering Technologist or equivalent designation will be viewed favorably
 - o Combinations of experience and relevant courses will also be considered
- One to two years of related experience with estimating building structures in a manufacturing environment
- Proficiency with Microsoft Office and AutoCAD programs are a requirement
 - o Experience with 3D design and animation programs is an asset
- Solid communication and interpersonal skills
- Above average mathematical skills; a strong, resourceful problem solver
- Attention to detail, time and priority management are necessary for success
- Ability to work in fast-paced environment, continually adapt to change and work under pressure

This position offers a competitive rewards package, professional growth, career development and continuous learning opportunities.
