Biological Assessment Summer Student Intern

A red diamond graphic with a black outline, centered between two horizontal lines.

Syngenta Canada, Inc. is looking for qualified students for summer positions at our Research Farm located near Portage la Prairie, Manitoba. The Syngenta Research and Regulatory Affairs department is the most successful in Canada, currently registering more new products than any other company. We are looking for skilled personnel who can overcome the challenges associated with carrying out a field research program. **Syngenta Canada, Inc.** is committed to setting the standard in quality agricultural research by conducting the finest trials in the industry. If you feel you meet the qualifications listed below and are looking for excellent experience in the crop protection industry please apply with a resume and cover letter.

QUALIFICATIONS:

- Pursuing a degree in agriculture or related field
- A good understanding of farming and agronomic practices
- Farm background or Agricultural industry experience an asset
- Clean driving record. Class 3 driver's license preferred.
- Positive attitude towards problem solving
- Enjoy working outdoors in a team environment
- Physically capable of performing duties required
- Willing to work flexible hours (i.e. overtime, weekends.)
- Transportation between home and work is your responsibility

Job title: Biological Assessment Summer Student Intern.

Salary: Monthly based on education and past experience.

Job Location: Elm River Research Farm, Portage la Prairie, MB

Job type: Summer, four months (May to August)

Submit resume to: marc.brown@syngenta.com

Deadline: February 15, 2020

Special note: No student has ever left our team in Manitoba once joining other than to pursue a full time job. It says a lot about the experience!!!
