2. Pension matching
3. Competitive salaries and wages
4. Work life balance
5. Regular social events

Job Summary

This role is responsible for a **hands-on** approach to the development of new product, prototype fabrication, testing, and production releases. If you enjoy finding solutions and have mechanical ability to work hands-on to develop and improve agricultural products, this position suits you. Infield communication and troubleshooting skills with end users (farmers) and the agriculture sales team is essential.

Duties and Responsibilities

- Strong understanding of seeding equipment
- Fabrication of jigs and fixtures
- Designing and fabricating prototype product
- In-field, 3rd party, and bench testing with documentation of data
- Troubleshooting product issues with customers

Requirements

To be considered for this position, applicants must possess the following characteristics:

- Experience** - An agricultural background with an interest in farming and farming equipment
- Mechanic or agricultural service technician experience would be assets
- Skills** - Ability to weld with strong metal working skills
- Mechanical aptitude for understanding manufacturing processes and machinery
- A desire to learn CAD modelling and technical drawing
- Basic understanding of CNC and manual machining equipment, tool and die manufacturing, and metal forming would be assets
- Attributes** - A team player who contributes and supports the Core Values of the organization

How to Apply

Please forward resumes via email to RGroening@atomjet.com or drop off in person to Atom-Jet Industries Ltd., 2110 Park Ave, Brandon, MB.
