

JOIN HTFC WINNIPEG

Are you an energetic, driven professional looking to positively shape the healthy and sustainable evolution of Saskatchewan's communities and ecoregions? Are you looking to stretch your creativity on complex design challenges within dynamic high profile project teams from a home base in Winnipeg's lively East Exchange District neighbourhood? Do you want to learn new skills from experienced mentors in a fast-paced office looking to grow future leaders? If this is you, we want to hear from you.

Why Join HTFC's Winnipeg Studio:

HTFC works across Canada's prairie, boreal and tundra regions. When you join HTFC you will be working within collaborative teams on urban spaces, waterfronts, public parks, cultural landscapes, landmark destinations, and vibrant mixed use developments, carefully selected to continue HTFC's 50+ year focus on sustainable, authentic, and place specific design. To learn more about our work visit <https://htfc.ca/>

HTFC works hard to foster an open and creative office culture where the crosspollination of ideas thrives through knowledge sharing, collective brainstorming, community events, and the occasional design competition. We work hard and play hard within a high paced environment that includes perpetually adopting new technologies and traveling. Our staff volunteer locally for initiatives that raise public awareness of the essential role design plays in human health and happiness, often assisting under resourced community groups with grassroots projects. We are dedicated to equity, diversity, and inclusion, working hard to welcome, learn from, and mentor a new generation of designers and technicians so they can express their backgrounds, world views, and cultures through their practice, making our work more meaningful and accessible in the process.

HTFC offers a flexible work environment, an experienced team of professional mentors, a peer support system, and an excellent compensation package that includes a competitive salary, comprehensive health and wellness benefits, professional dues, and a professional development allowance.

Who Should Apply:

Our ideal candidates will be creative, open-minded, and adventurous with a background that combines a passion for design with the communication and technical skills that bring big ideas to life. We need people who are confident in their construction documentation and field services skills with the gusto to build strong client relationships and learn new technologies. Regardless of what position you are applying for it is essential for you to be intuitive, rigorous, independent, and empathetic. You communicate well in verbal, graphic and written form and have a valid driver's licence to support independent travel to project sites.

Architectural Technologist

- Diploma or certificate in a recognized drafting technology program such as RRC Polytech, NAIT, Assiniboine Community College, SaskPolytech. Some work experience developing landscape construction documents, cost estimates, specifications, renderings, and 3D visualizations for architectural, civil engineering or landscape architectural practices or working construction will be considered an asset.
- Working knowledge of digital drafting and modeling software on a PC or MAC platform. AutoCad, VectorWorks, Sketchup, and BIM integration software proficiency required. Previous experience using 3D Studio Max, Enscape, Twinmotion, and/or Lumion preferred.
- Working knowledge of Microsoft suite especially Excel, Outlook, Teams, and Word.

HOW TO APPLY:

To apply submit your cover letter, resume and a short portfolio of your relevant work (max 20 pages) to employment@htfc.ca by 5pm Monday April 15, 2024. Only candidates of interest will be contacted to discuss next steps.
