

## **Surveyor**

### **What does your day at GIP look like?**

- Complete field surveys and work closely with the Project Manager to ensure all daily objectives are met.
- Create designs from construction plans for layout and machine control.
- Coordinate site surveyors, and required instrumentation for projects.
- Tracking aggregate production using aerial photogrammetry processing software.
- Perform “Take-offs” for current or upcoming project bidding & quantities.
- Setup, calibrate, and monitor GPS machine control on graders, dozers, and excavators.

### **Enough about us, let’s talk about you.**

- Construction Survey Experience 1 - 3 years
- Class 5F Drivers License and a clean drivers abstract
- Data Prep and Modelling
- Roadway and Parking Lot Design
- Drone Surveying Experience
- Aerial Mapping utilizing Drone Technology

### **Our purpose**

At Green Infrastructure Partners (GIP), our people are second to none. The work we do impacts lives. It impacts our schools and neighbourhoods and shapes our communities and cities.

We are one of Canada’s largest and fastest growing construction companies. Every day our people are designing, delivering, and maintaining infrastructure for Canada’s rapidly growing cities. From demolition, shoring and foundations, excavation, remediation, to structures, paving and the production of materials, we have the unique ability to self perform all project scopes without reliance on sub-contractors.

The most valuable asset at GIP is people – our employees, our customers, and the public. Nothing is more important than our people coming to work happy and leaving safe.

We are committed to fostering a work environment that embraces Diversity, Equity, Inclusion and Belonging for all so our people benefit from the creative solutions that come from embracing differences.

Sustainability is part of our DNA. We focus on recycling and reusing materials by taking old roads and reengineering them into new roads, keeping tons of used materials out of our landfills.

The work we do today at GIP will carry us into a better, greener, and safer tomorrow.

## **About the GIP Team**

As we look to the future, we need creative, ambitious, and innovative professionals like you who can help us to build the world of tomorrow, today.

GIP team members are at the heart of our success in designing and delivering infrastructure projects safely, thoughtfully, and with the highest quality. Our culture allows employees to bring their A Game to work each day. If you want to work for a world-class organization that provides an exceptional career experience with an inclusive and collaborative culture, this opportunity is for you!
