Progress creates a career opportunity in **Brandon, MB or Winnipeg, MB**

.Net Application Programmer

Our .Net Application Programmer is responsible to write, code, test and analyze programs, and lead application development all the way through to deployment, either independently or as the head of team. The Junior Application Programmer will also research, design, document, modify software specifications, analysis of business needs, and communicating with project stakeholders throughout the production life cycle of a project.

This role requires:

- Bachelor Degree in Computer Science, Information Systems, Business Administration, Commerce or equivalent work experience.
- Proven work experience in Application Development (3 to 5 years)
- C# / VB .Net environment/familiarity with the Microsoft development tools and technologies preferred.
- Experience with web based architectures and design practices such as ASP.Net, React JS, Angular JS, Bootstrap, JavaScript, node.js, HTML, and CSS.
- Previous experience in client server windows and web based applications.
- Knowledge of database design and queries, SQL (MS SQL Server 2014), DB2 (iSeries)
- Team player with excellent communication skills
- Strong organizational skills to juggle multiple tasks within the constraints of timelines and budgets.
- Broad knowledge of applications, computer-based information systems, networking, system management, security, telecommunications, web technologies and user support services is required.
- Able to provide detailed estimates for timelines on the software development cycle
- Strong analyst skills are a must, with a focus on gathering requirements and recommending solutions
- Ability to define development requirements and assist in the integration of third party tools and applications
