

Career Opportunity

Technician (1 yr. Term)

Inter-Mountain Watershed District

The Position:

The Inter-Mountain Watershed District (WD) requires a technician to work out of the Ste. Rose office for a 1-year term to provide direction and technical expertise towards the development of watershed planning and program implementation initiatives. The long term goal is to encourage sustainable use and integrated management of watershed resources through cooperation with Federal, Provincial, and Municipal Governments. The District is the lead water authority within the following area: the entire municipalities of Ste. Rose and McCreary, as well as the southern portion of the municipality of Lakeshore, and portions of the municipalities of Alonsa, Rosedale, and Dauphin. The WD manages a complex system of water control infrastructure in this area, and also delivers conservation programming to residents across the Dauphin Lake watershed in order to protect the quality of water within the watershed.

Reporting to the Infrastructure Program Coordinator, the incumbent is responsible for:

- Providing leadership and direction in the development of programming strategies for application throughout the District.
- Delivery and design of water control infrastructure projects, including the development of short and long term management strategies for infrastructure initiatives; as well as detailed project management.
- Working in the field in inclement weather on projects with contractors.
- Designing projects and estimating associated costs.
- Surveying with GPS RTK unit and mapping drone (Sensefly eBee).
- Post-processing of survey data and creating profiles.
- Grant and report writing.
- Fish population surveying.
- Office administration.
- Promoting and supporting overall district goals and objectives.
- Supervise summer students and contractors.

Qualifications:

Graduation from a recognized program in natural resource management, environmental sciences and/or environmental engineering/technical program and/or extensive experience in resource program planning and management through knowledge of agricultural land use and fundamental watershed principles. Must have strong communication (verbal & written) and interpersonal skills, ability to multitask, and use computers with various Microsoft Office packages. Previous experience with the management of water control infrastructure, GIS, fisheries research, AutoCAD, surveying, and post-processing software such as Global Mapper are assets. Holding a drone pilot certificate is also an asset.

Expected start date is May 4, 2020. Applicants should forward their résumés (including a list of references and salary expectations) no later than **4:30p.m., WEDNESDAY, April 15, 2020 to:**

Inter-Mountain Watershed District
Box 449, 630 Central Ave.
Ste. Rose du Lac, Manitoba R0L 1S0
Fax: 204-447-4070
Email: trwcd@mymts.net

The Inter-Mountain Watershed District would like to thank all applicants for their interest; however, only those selected for an interview will be contacted.
