Players who play roles in movies are called actors (men) or actresses (women). There is also the term "extra", which is used as a minor role in the movie with few characters. This is different from the main actors who play bigger and more roles. As an actor, one must have the acting talent corresponding to the theme of the movie he starred in. In some scenarios, the role of the actor can be replaced by a stuntman or stuntman. The presence of stunt actors is important for replacing actors who play difficult and extreme scenes that are usually common in action movies. Movies can also be used to convey certain information about the

film producer. Some industries also use movies to convey and represent their symbols and culture. Filmmaking is also a form of visual expression, thought, concept, concept, feeling and emotion in film. The movies themselves are mostly fictional, although some are based on real stories or real stories. There are also documentaries with original and true images or biographical films that tell the story of a character. There are many other popular types of movies, including action movies, horror movies, comedies, romantic movies, fantasy movies, thrillers, drama movies, science fiction movies, crime movies, documentaries, etc. This is some information about film or the definition of film. This information has been cited from various sources and references. Hope it will be useful.

Work of art in the form of a series of live images that are rotated to produce an illusion of moving images that are presented as a form of entertainment. The illusion of a series of images produces continuous motion in the form of video. The film is often referred to as a movie or moving picture. Film is a modern and popular art form created for business and entertainment purposes. Film making has now become a popular industry throughout the world, where feature films are always awaited by cinemas. Films are made in two main ways. The first is through shooting and recording techniques through film cameras. This method is done by photographing images or objects. The second uses traditional animation techniques. This method is done through computer graphic animation or CGI techniques. Both can also be combined with other techniques and visual effects. Filming usually takes a relatively long time. It also requires a job desk each, starting from the director, producer, editor, wardrobe, visual effects and others. Definition and Definition of Film / Movie While the players who play a role in the film are referred to as actors (men) or actresses (women). There is also the term extras that are used as supporting characters with few roles in the film. This is different from the main actors who have bigger and more roles. Being an actor and an actress must be demanded to have good acting talent, which is in accordance with the theme of the film he is starring in. In certain scenes, the actor's role can be replaced by a stuntman or a stuntman. The existence of a stuntman is important to replace the actors doing scenes that are difficult and extreme, which are usually found in action action films. Films can also be used to convey certain messages from the filmmaker. Some industries also use film to convey and represent their symbols and culture. Filmmaking is also a form of expression, thoughts, ideas, concepts, feelings and moods of a human being visualized in film. The film itself is mostly a fiction, although some are based on fact true stories or based on a true story.

There are also documentaries with original and real pictures, or biographical films that tell the story of a character. There are many other popular genre films, ranging from action films, horror films, comedy films, romantic films, fantasy films, thriller films, drama films, science fiction films, crime films, documentaries and others. That's a little information about the definition of film or movie. The information was quoted from various sources and references. Hope it can be useful.

◇ STREAMING MEDIA ◇

Streaming media is multimedia that is constantly received by and presented to an end-user while being delivered by a provider. The verb to stream refers to the process of delivering or obtaining media in this manner.[clarification needed] Streaming refers to the delivery method of the medium, rather than the medium itself. Distinguishing delivery method from the media distributed applies specifically to telecommunications networks, as most of the delivery

systems are either inherently streaming (e.g. radio, television, streaming apps) or inherently non-streaming (e.g. books, video cassettes, audio CDs). There are challenges with streaming content on the Internet. For example, users whose Internet connection lacks sufficient bandwidth may experience stops, lags, or slow buffering of the content. And users lacking compatible hardware or software systems may be unable to stream certain content. Live streaming is the delivery of Internet content in real-time much as live television broadcasts content over the airwaves via a television signal. Live internet streaming requires a form of source media (e.g. a video camera, an audio interface, screen capture software), an encoder to digitize the content, a media publisher, and a content delivery network to distribute and deliver the content. Live streaming does not need to be recorded at the origination point, although it frequently is. Streaming is an alternative to file downloading, a process in which the end-user obtains the entire file for the content before watching or listening to it. Through streaming, an end-user can use their media player to start playing digital video or digital audio content before the entire file has been transmitted. The term "streaming media" can apply to media other than video and audio, such as live closed captioning, ticker tape, and real-time text, which are all considered "streaming text". Elevator music was among the earliest popular music available as streaming media; nowadays Internet television is a common form of streamed media. Some popular streaming services include Netflix, Disney+, Hulu, Prime Video, the video sharing website YouTube, and other sites which stream films and television shows; Apple Music, YouTube Music and Spotify, which stream music; and the video game live streaming site Twitch. gret

◇ COPYRIGHT ◇

Copyright is a type of intellectual property that gives its owner the exclusive right to make copies of a creative work, usually for a limited time. The creative work may be in a literary, artistic, educational, or musical form. Copyright is intended to protect the original expression of an idea in the form of a creative work, but not the idea itself. A copyright is subject to limitations based on public interest considerations, such as the fair use doctrine in the United States. Some jurisdictions require "fixing" copyrighted works in a tangible form. It is often shared among multiple authors, each of whom holds a set of rights to use or license the work, and who are commonly referred to as rights holders. [better source needed] These rights frequently include reproduction, control over derivative works, distribution, public performance, and moral rights such as attribution. Copyrights can be granted by public law and are in that case considered "territorial rights". This means that copyrights granted by the law of a certain state, do not extend beyond the territory of that specific jurisdiction.

Copyrights of this type vary by country; many countries, and sometimes a large group of countries, have made agreements with other countries on procedures applicable when works "cross" national borders or national rights are inconsistent. Typically, the public law duration of a copyright expires 50 to 100 years after the creator dies, depending on the jurisdiction. Some countries require certain copyright formalities to establishing copyright, others recognize copyright in any completed work, without a formal registration. In general, many believe that the long copyright duration guarantees the better protection of works. However, several scholars argue that the longer duration does not improve the author's earnings while impeding cultural creativity and diversity. On the contrast, a shortened copyright duration can increase the earnings of authors from their works and enhance cultural diversity and creativity.

And yet, after that go-for-broke preamble, it's hard not to feel like In the Heights is all dressed up and, even with its various inter-game missions and boss-level fights, left with nowhere really to go. If the first film doubled as a parenting parable, this second one concerns the pains of letting someone leave the nest, yet even that concept feels curiously unexplored here. Ditto the idea that, when it comes to the social contract under duress, you will see the best of humanity and, most assuredly, the worst — a notion that not even Krasinski, who made Part 1 in the middle of the Trump era, could have guessed would resonate far more more loudly now. (What a difference a year, and a global pandemic followed by an political insurrection, makes.) You may recognize two actors who show up late in the game, one of whom is camouflaged by a filthy beard, and wonder why they're dispatched so quickly and with barely a hint of character development — especially when it

brings up a recurring cliché in regards to who usually gets ixnayed early from genre movies. Unless, of course, it's a feint and they're merely waiting in the wings, ready for more once the next chapter drops. Which brings us to the movie's biggest crime.

Without giving any specifics away (though if you're sensitive to even the suggestion of spoilers, bye for now), *In the Heights* ends on a cliffhanger. A third film, written and directed by *Midnight Special*'s Jeff Nichols, is in the works. And while many follow-ups to blockbusters serve as bridges between a beginning and an ending — some of which end up being superior to everything before/after it — there's something particularly galling about the way this simply, abruptly stops dead in its tracks. No amount of clever formalism or sheer glee at being back in a movie theater can enliven a narrative stalled in second gear, and no amount of investment in these family members can keep you from feeling like you've just sat through a placeholder, a time-killer.

In the Heights was a riff on alien invasion movies with chops and a heart, a lovely self-contained genre piece that struck a chord. Part II feels like just another case of sequel-itis, something designed to metastasize into just another franchise among many. Just get through this, it says, and then tune in next year, next summer, next financial quarter statement or board-meeting announcement, for the real story. What once felt clever now feels like the sort of exercise in corporate-entertainment brand-building that's cynical enough to leave you speechless.

○○○ FI TV Movie ○○○

The first TV shows were experimental and appeared occasionally. Since the 1930s, they can only be watched close to the mast. TV shows, such as the 1936 Summer Olympics in Germany, where King George VI was crowned. In the United Kingdom in 19340, and the launch of the famous David Sarnoff at the New York World's Fair in 1939, this medium continued to develop, but the Second World War stalled its development after the war. . The world movie of 19440 inspired many Americans, who bought the first television. In 1948, the popular Texaco Theater radio station became the first weekly TV variety show. The show was hosted by Milton Burley and won the title of "Mr. TV", indicating that the media is stable and a modern form of entertainment that can attract advertisers. On September 4, 1951, this was the first national live television program in the United States. When President Harry Truman gave a speech on AT&T's transcontinental cable and microwave relay system on the San Francisco-Japan Peace Treaty, He has already broadcast to the local market company. Yes. On January 1, 1954, the United States held its first national color show (1954 Rose Parade Championship). In the next decade, most Internet broadcasts and almost all local broadcasts continued to be broadcast in black and white. The color switch was announced in the fall of 1965, and more than half of Internet prime time programs were broadcast in color. One year later, the first full-color peak season arrived. In 19402, the last support for the daytime network program was converted into the first full-color network season.

○○○ Format and genre ○○○

See also: List of genres § Movie and TV formats and genres Due to the variety of formats and types that can be presented, TV programs are more diverse than most other media. Performances can be fictional (such as comedy and drama) or non-fiction (such as documentaries, news and reality shows). It can be the latest (such as local news programs and some TV movies) or historical (such as many documentaries and fictional movies). They can be educational or entertaining, just like episodic comedies and game shows. [Citation needed] Drama programs usually consist of a series of actors who play roles in historical or modern environments. The plan follows their lives and adventures. Before the 1980s, performances (except for soap opera series) usually remained static, without a storyline, and the main characters and premises were almost unchanged. [Citation needed] If there is some change in the life of the character in the episode, it is usually reversed at the end. Therefore, the episodes can be broadcast in any order. [Citation needed] Since the 1980s, many FILMS have gradually changed their plot, character, or both. For example, Hill Street Blues and St. Elsewhere are the first prime-time drama TV movies with this dramatic structure in the United States[4] [need better sources], And the later MOVIE Babylon 5

further explained that this structure has the scheduled story of five seasons related to the plan. [Citation needed] According to reports, TV accounted for more than movies in the revenue of major media companies in 2019. Some people have also noticed that the quality of certain TV programs has improved. In 2019, Oscar-winning film director Steven Soderbergh announced the ambiguity and complexity of characters and narratives:

○○○Thank you for everything, and wish you a happy watching○○○
