# Free Clash Royale Hack Gems and Golds 2021 *{sun}*

UPDATED: Aug 06, 2021

You are about to learn to be addictive with this supercell game. This adventure game is one of the bests I have seen. It is a multi-player that allows you to play with your friends. The major goal of every battle in this is to get hold of your opponent's three crown tower which has to be done with strategy. One of the things this game test is your card knowledge and strategy timing. Let me give some tips on how to level up faster than before, build your clan, earn trophies, and also upgrade your cards.

How to Get Free Gems and Golds For Clash of Royale in 2020

- To get more gems and golds, give cards to your clan member, and you will be rewarded with gems and gold. You can also ensure that you have high-ranked members in your clan who can give you cards.

- Always be patient to study an opponent before launching your attack. Don't just be in a hurry to send your giant while attacking nor skeleton army while defending.

- Pay attention to your opponent's cards. It is not all about getting a powerful card because even powerful cards can be destroyed with the right counter card. Store and always be ready to use counter cards for your opponent.

- Attack in pairs; don't send one troop type out alone. It is better to wait for your elixir to charge that you might at least release two troops at once.

If you want to have unlimited gems and gold this is for you.

The clash royale hack tool helps you to decode the encrypted programming code and give you any amount of gem and gold you want without cost.

One of the ways you can hack the game is to get the cheat codes and enter it in the game activation menu. These codes won't be highlighted in this article because it changes every day but you can always look out for new codes daily.

You can also access the clash royale online generator and then fill the four fields there which are the username, amount of gems, amount of coins, and select device. You choose a username that you will use continually, and then enter the number of gems you want; the next field is the coin field, so you fill your desired amount of coins too, and finally specification your device type. After filling the fields appropriately, click 'start generator' then wait and see your gem and coin being processed.

Some of the features of clash royale hack tool include no restriction while playing, anti-ban security, unlimited numbers of gems, and it is not detectable.

Clash royale hack for ios/android

Are you finding it difficult to play the game on your android or ios then check this out?

• Install the software on your phone and your computer.

• You can open the application by clicking on setting and capturing to set the input, audio, quality and display, and so on.

• Enable USB debugging on your phone then connect your phone to your computer through a USB cable.

• After connecting you can use your mouse to play clash royale on your system for free.

Apply the above tips and also check out for cheat codes to have a better experience with clash royale.
